2nd International Workshop on Biologics and Biomedical Sciences: Biomedical Engineering and Its Role in Biological Advances

About the Workshop:

The second International Workshop on "Biologics and Biomedical Sciences" is to provide a forum for faculty members and young researchers to meet with distinguished speakers and expand their knowledge of Biology and related subjects.

In addition, this will facilitate the exchange of intra- and inter-disciplinary ideas and accelerate the formation of new partnerships between biologists, researchers, and biomedical engineers.

Workshop Objectives:

The workshop on "Biomedical engineering and its role in biological advances" is organized to achieve the following cognitive objectives:

1. To provide a venue for researchers and specialists in Biology and related sciences to communicate their knowledge and research findings.
2. To promote partnerships and networking opportunities between researchers and subject matter specialists.
3. To provide a forum for the discussion of current trends and challenges in the field of biomedical engineering
4. To provide a platform for the presentation of new research findings and developments in this field.

Speakers:

Prof. Dr. Hesham A. El Enshasy

Faculty of Chemical Engineering and Energy, Institute of Bioproducts Development, University Technology Malaysia (UTM).

Prof. Dr. Abdulkarim Yassin Karim

Department of Biology, College of Science, Salahaddin University-Erbil.

Prof. Dr. Young Min Kwon

Department of Poultry Science & The Center of Excellence for Poultry Science, University of Arkansas.
